

TEZZA

VITICOLTORI IN VALPANTENA

Immersed in the winemaking traditions of the Valpantena and Valpolicella areas, the Tezza family has been producing wines for three generations. Established in 1960, the Tezza winery today is an example of a short production chain that applies a fundamental principle: in order to ensure authenticity, transparency and

excellence, each and every step of the winemaking process must be traceable. From planting the vines in the family vineyards to looking after the grapes, harvesting, making the wine and bottling: every step of the production cycle is carried out within the winery. Our wines are exported and enjoyed around the world,

and they express the dedication, care and energy the three cousins Flavio, Federico and Vanio have shown since 1998 in their roles as winemakers from a land steeped in winemaking history.
